GOAL OF CAMPAIGN

The Illinois Campaign to Prevent Gun Violence (ICPGV), a project of Legal Community Against Violence, is a research-based, public education campaign to promote meaningful statewide gun policy reform. In collaboration with an advisory team representing law enforcement, the medical and public health communities, faith-based organizations, local and state policymakers and advocacy groups, the goal of ICPGV is to inform the public and media on the facts about gun violence and the importance of prevention policies.

METHODOLOGY

Overbrook Research (R) and Lake Research Partners (D) completed 603 telephone surveys with Illinois registered voters from a random sample of Illinois residential phone numbers. The resulting sample matches the regional distribution of the electorate and has the following demographics: 47% male, 53% female; 77% Caucasian, 13% African American, 3% Hispanic, 1% Asian, 1% Other and 6% Not known; 49% Democrats, 39% Republicans and 7% Independents.

In addition to the statewide phone survey, 300 voters were interviewed in four Illinois state senate districts: 21, 23, 28, 43. District residents were identified by matching census tract/block group numbers to telephone records listed within those geographic locations.

The sampling error for the statewide survey is +/-4%, at a confidence level of 95% and the sampling error for the district interviews is +/-5.7%. The surveys and interviews were conducted between February 17-25, 2007.
